PROFESSIONAL SUMMARY

MERN Stack Developer and Final-Year B.Tech Computer Science student with hands-on experience in building and deploying full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Developed multiple production-ready applications including HRMS, School Management System, and Cloud Storage Platform. Experienced in REST APIs, JWT Authentication, RBAC, and modern deployment workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3
Frontend: React.js, Redux Toolkit, Tailwind CSS, Framer Motion, Responsive Web Design
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication (httpOnly cookies, access/refresh)
Databases: MongoDB, MongoDB Atlas, Firebase Firestore
Tools & Platforms: Git, GitHub, GitHub Actions (CI/CD), VS Code, Vercel, Render, Firebase, Postman
Other: WordPress, Tally Prime & ERP 9, MS Office Suite, Adobe Photoshop, CorelDraw
AI-Assisted Tools: Highly proficient and friendly working with Claude, ChatGPT, and other LLM tools to accelerate coding, debugging, documentation, and overall workflow

PROJECTS

NexHRMS - Full-Stack HR Management System | *React.js, Redux Toolkit, Node.js, Express.js, MongoDB Atlas, JWT*
GitHub: github.com/Abhishek8827/NexHRMS | Live Demo: nexhr-api.vercel.app

- Developed a full-stack HRMS with 10+ modules and 30+ REST APIs supporting employee, payroll, attendance management, leave tracking, onboarding, and reporting.
- Implemented role-based access control (RBAC) across a four-tier hierarchy (Admin, HR, Manager, Employee) to enforce secure, scoped data access.
- Built secure authentication using JWT with httpOnly cookies and an access/refresh token rotation pattern.
- Diagnosed and resolved critical production issues including CORS misconfigurations, Redux slice export mismatches, and request validation errors, improving deployment stability.
- Implemented full mobile responsiveness and redesigned the login experience with a dark glassmorphism UI using Tailwind CSS and Framer Motion.
- Deployed the frontend on Vercel and backend on Render, with MongoDB Atlas as the database layer.

Cloudy — Cloud File Manager (Google Drive Clone) | *React.js, Firebase (Auth, Firestore, Storage), Gemini AI*

- Built a cloud file management web app with Google Sign-In authentication via Firebase Auth.
- Implemented real-time file uploads to Firebase Storage with file metadata managed in Firestore.
- Integrated a Gemini AI panel to enable intelligent, conversational file interaction.
- Configured a CI/CD pipeline using GitHub Actions to automate deployment to GitHub Pages.

TVSM School — Digital School Management System | *MERN Stack (MongoDB, Express.js, React.js, Node.js)*

- Designed and built a digital administration system to manage student and staff records, replacing manual record-keeping for 100+ users.
- Streamlined day-to-day coordination between school departments through centralized digital record access.

LensCulture — Responsive Photo Gallery | *JavaScript, Bootstrap, Tailwind CSS, HTML5/CSS3*

- Built a responsive, visually-driven photo gallery web app combining Bootstrap's grid/component system with Tailwind CSS utility classes for fine-grained custom styling.
- Implemented dynamic, filterable image categories along with a lightbox-style viewer for an immersive, distraction-free browsing experience.
- Optimized image loading and layout breakpoints for smooth performance and a consistent look across devices.
- Focused on clean UI/UX and visual hierarchy to show photography content in a gallery-first, content-forward design.

WORK EXPERIENCE

- MERN Stack Developer — Freelance** | Self-Employed

Jun 2025 – Present

 - Developed and deployed 5+ MERN applications from requirements gathering through production deployment.
- MERN Stack Developer Intern** | Codec Technologies Pvt. Ltd.

Jan 2025

 - Completed an AICTE & ICAC-approved, 1-month MERN Stack Developer internship; developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
 - Built and integrated RESTful APIs with JWT-based authentication; collaborated on complex project requirements while consistently exceeding expectations.
 - Received a Letter of Recommendation from the Program Manager (Dr. Anurag Shrivastava) for exceptional professionalism, technical skill, and problem-solving ability.
- Admin Head (In-Charge)** | TVSM School, Nepanagar

2024 – Present

 - Digitized and manage administrative operations, admissions, fee records, and staff documentation for a school serving 1,000+ students and 50+ staff members.
 - Coordinated operations across 5+ departments including academics, accounts, transport, and administration.
 - Collaborate with management, staff, parents, and vendors to support academic and operational excellence.
- Computer Instructor** | Sunrise Computer Institute, Nepanagar

2020 – 2024

(incl. Shree Siddhivinayak Education Group, Nepanagar)

 - Trained 200+ students in computer fundamentals and programming concepts, contributing to improved technical proficiency and supporting internship placement initiatives.

EDUCATION

- B.Tech, Computer Science & Engineering** | SDITS, Khandwa

2023 – 2026

RGPV, Bhopal | CGPA: 7.3~ / 10
- Diploma in Computer Science** | TSEC Polytechnic College, Burhanpur

2020 – 2023

RGPV, Bhopal | CGPA: 8.7 / 10
- Secondary Education (10th)** | Citizen H.S. School, Nepanagar

2020

M.P. Board | Score: 72.6%

CERTIFICATIONS

- MERN Stack Development — Codec Technologies (ICAC-recognized), Nov 2025
- MERN Stack Development Internship — Digital Computing, Khandwa (SDITS College)
- Responsive Web Design — freeCodeCamp (~300 hours), Mar 2023
- Cybersecurity — Tech Mahindra Foundation / Skill India Digital (NSDC), Feb 2024
- Fundamentals of Digital Marketing — Google Digital Garage (IAB & Open University endorsed), Sep 2021
- MDCA (Computers), ADCA (Computer Programming), Data Entry Operator — Foundational vocational IT certifications

ACHIEVEMENTS

- Received a Letter of Recommendation from the Program Manager at Codec Technologies for exceptional performance during the MERN Stack internship.
- Independently architected, built, and deployed NexHRMS — a full production HR management system spanning frontend, backend, and database layers.
- Independently built and deployed multiple full-stack production applications (NexHRMS, Cloudy, TVSM School System, LensCulture) while concurrently managing full-time administrative responsibilities.
- Balanced full-time professional work in administration, accounting, and IT support with B.Tech coursework and freelance MERN development without interruption to either.
